

1 INTRODUCTION

1.1 Overview

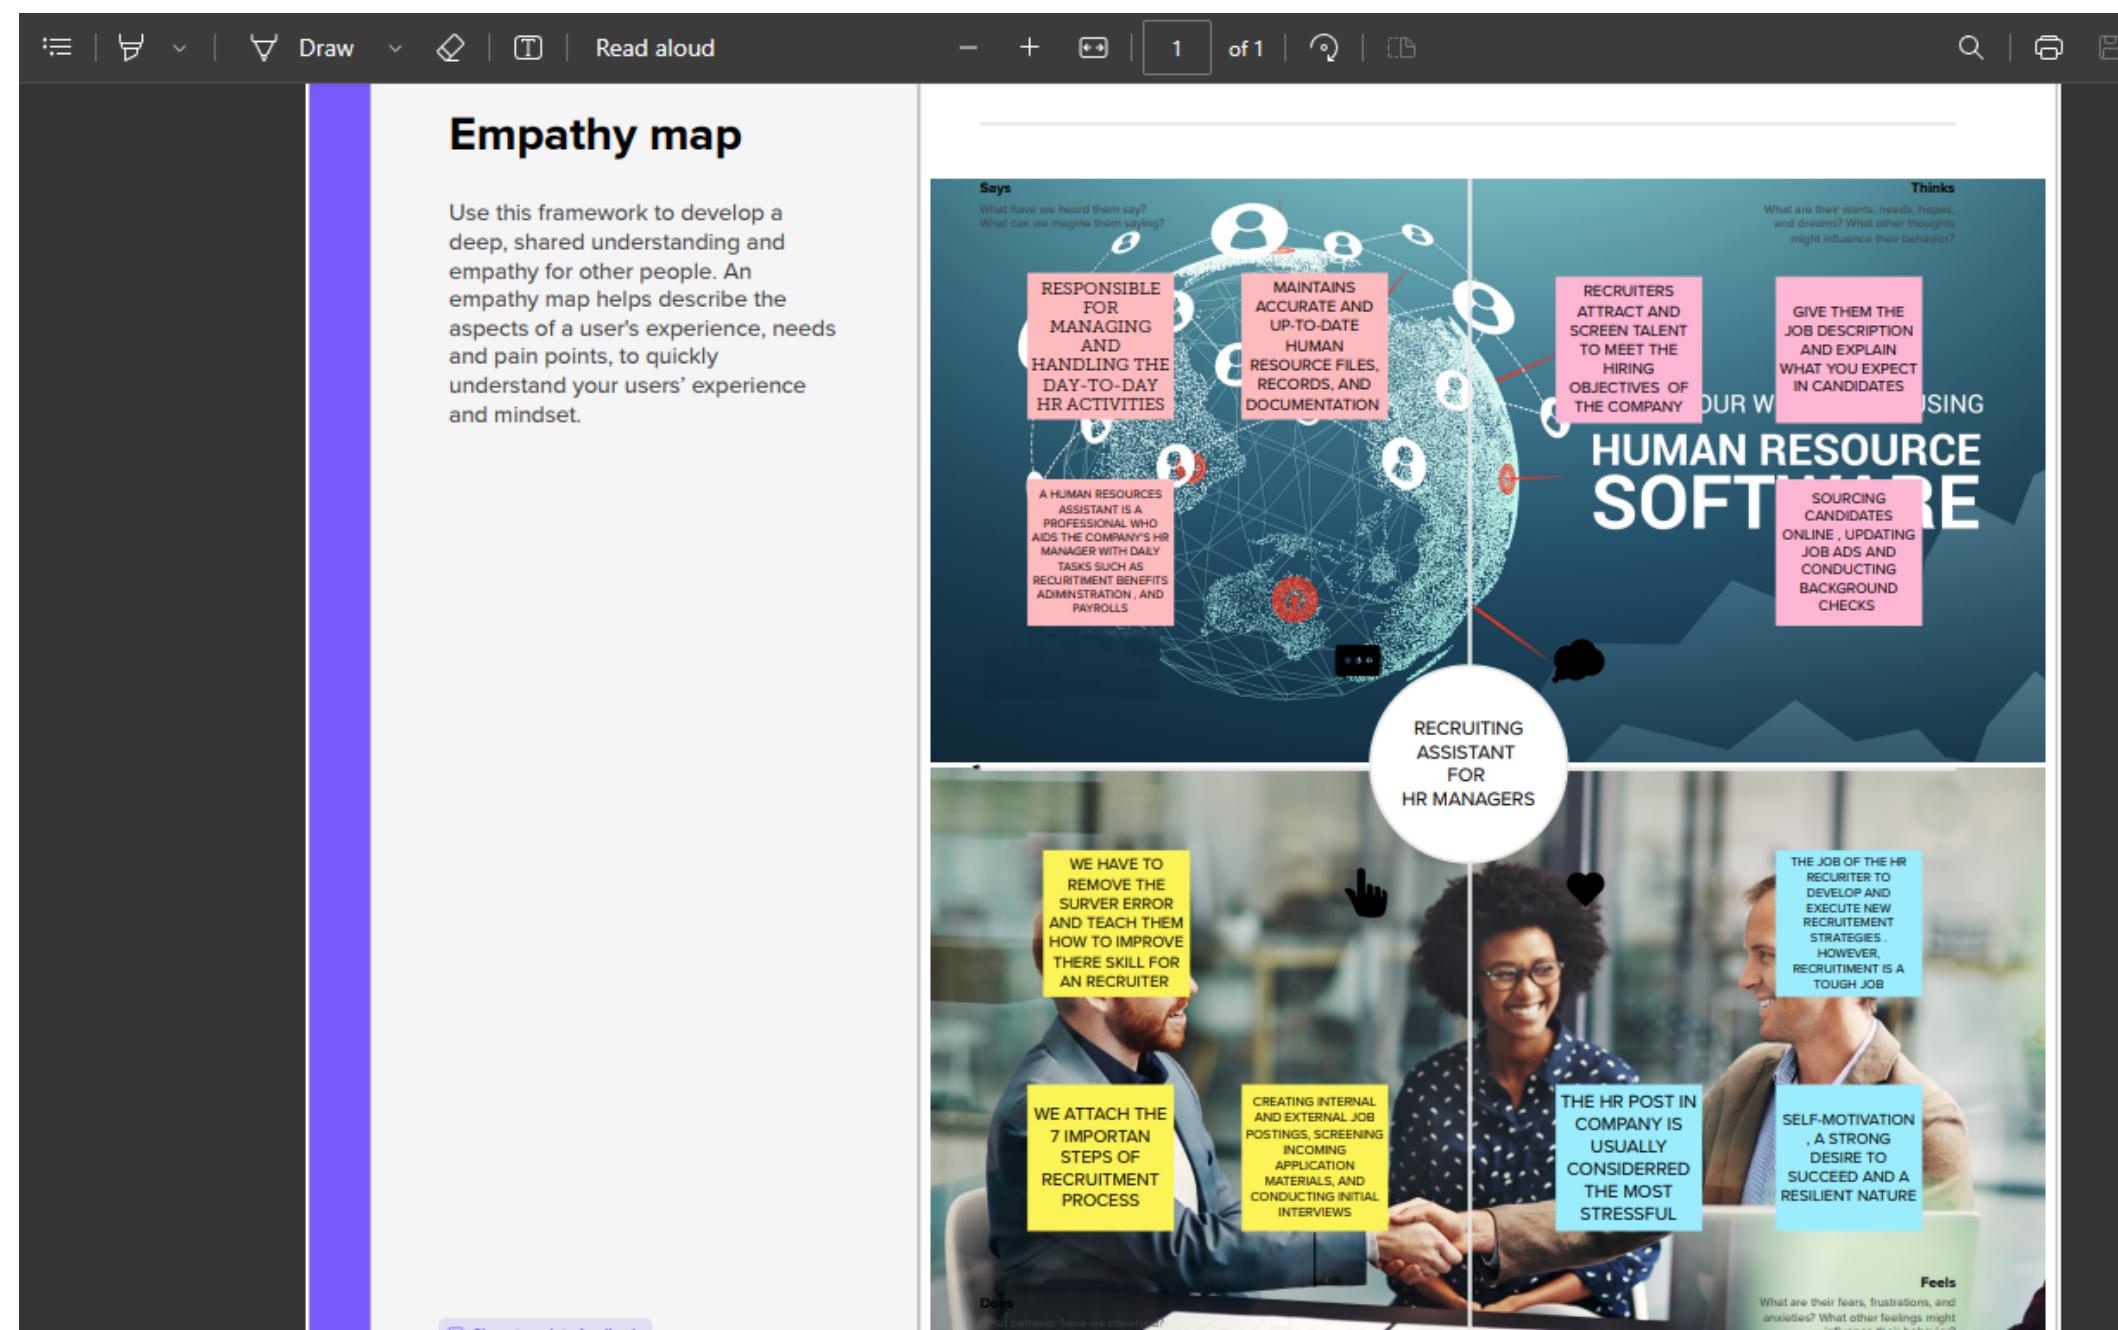

In this project, we use custom objects, relationships, page layouts to give the HR team easy access to data they need on an existing recruitment app.

1.2 Purpose

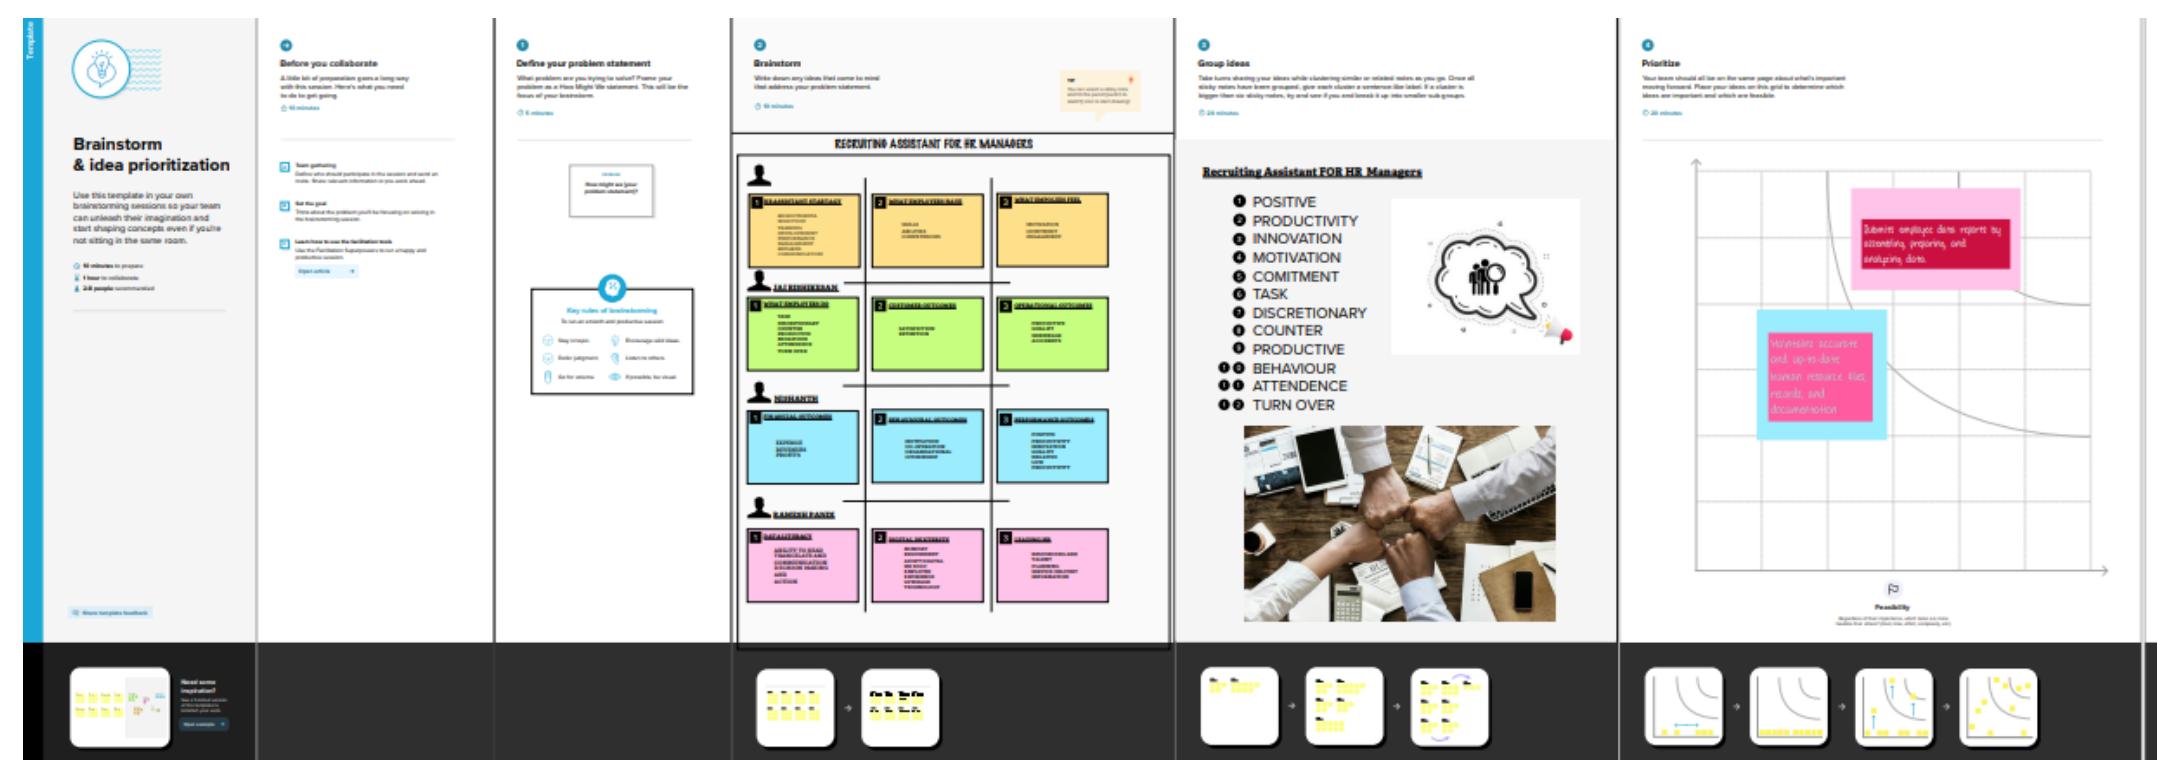

To make the existing app more efficient for the HR team we create custom objects and relationships to store and access the data more efficiently. We install an unmanaged package in the org to get metadata that acts as existing data in the recruitment app.

2 Problem Definition & Design Thinking

2.1 Empathy Map

2.2 Ideation & Brainstorming Map

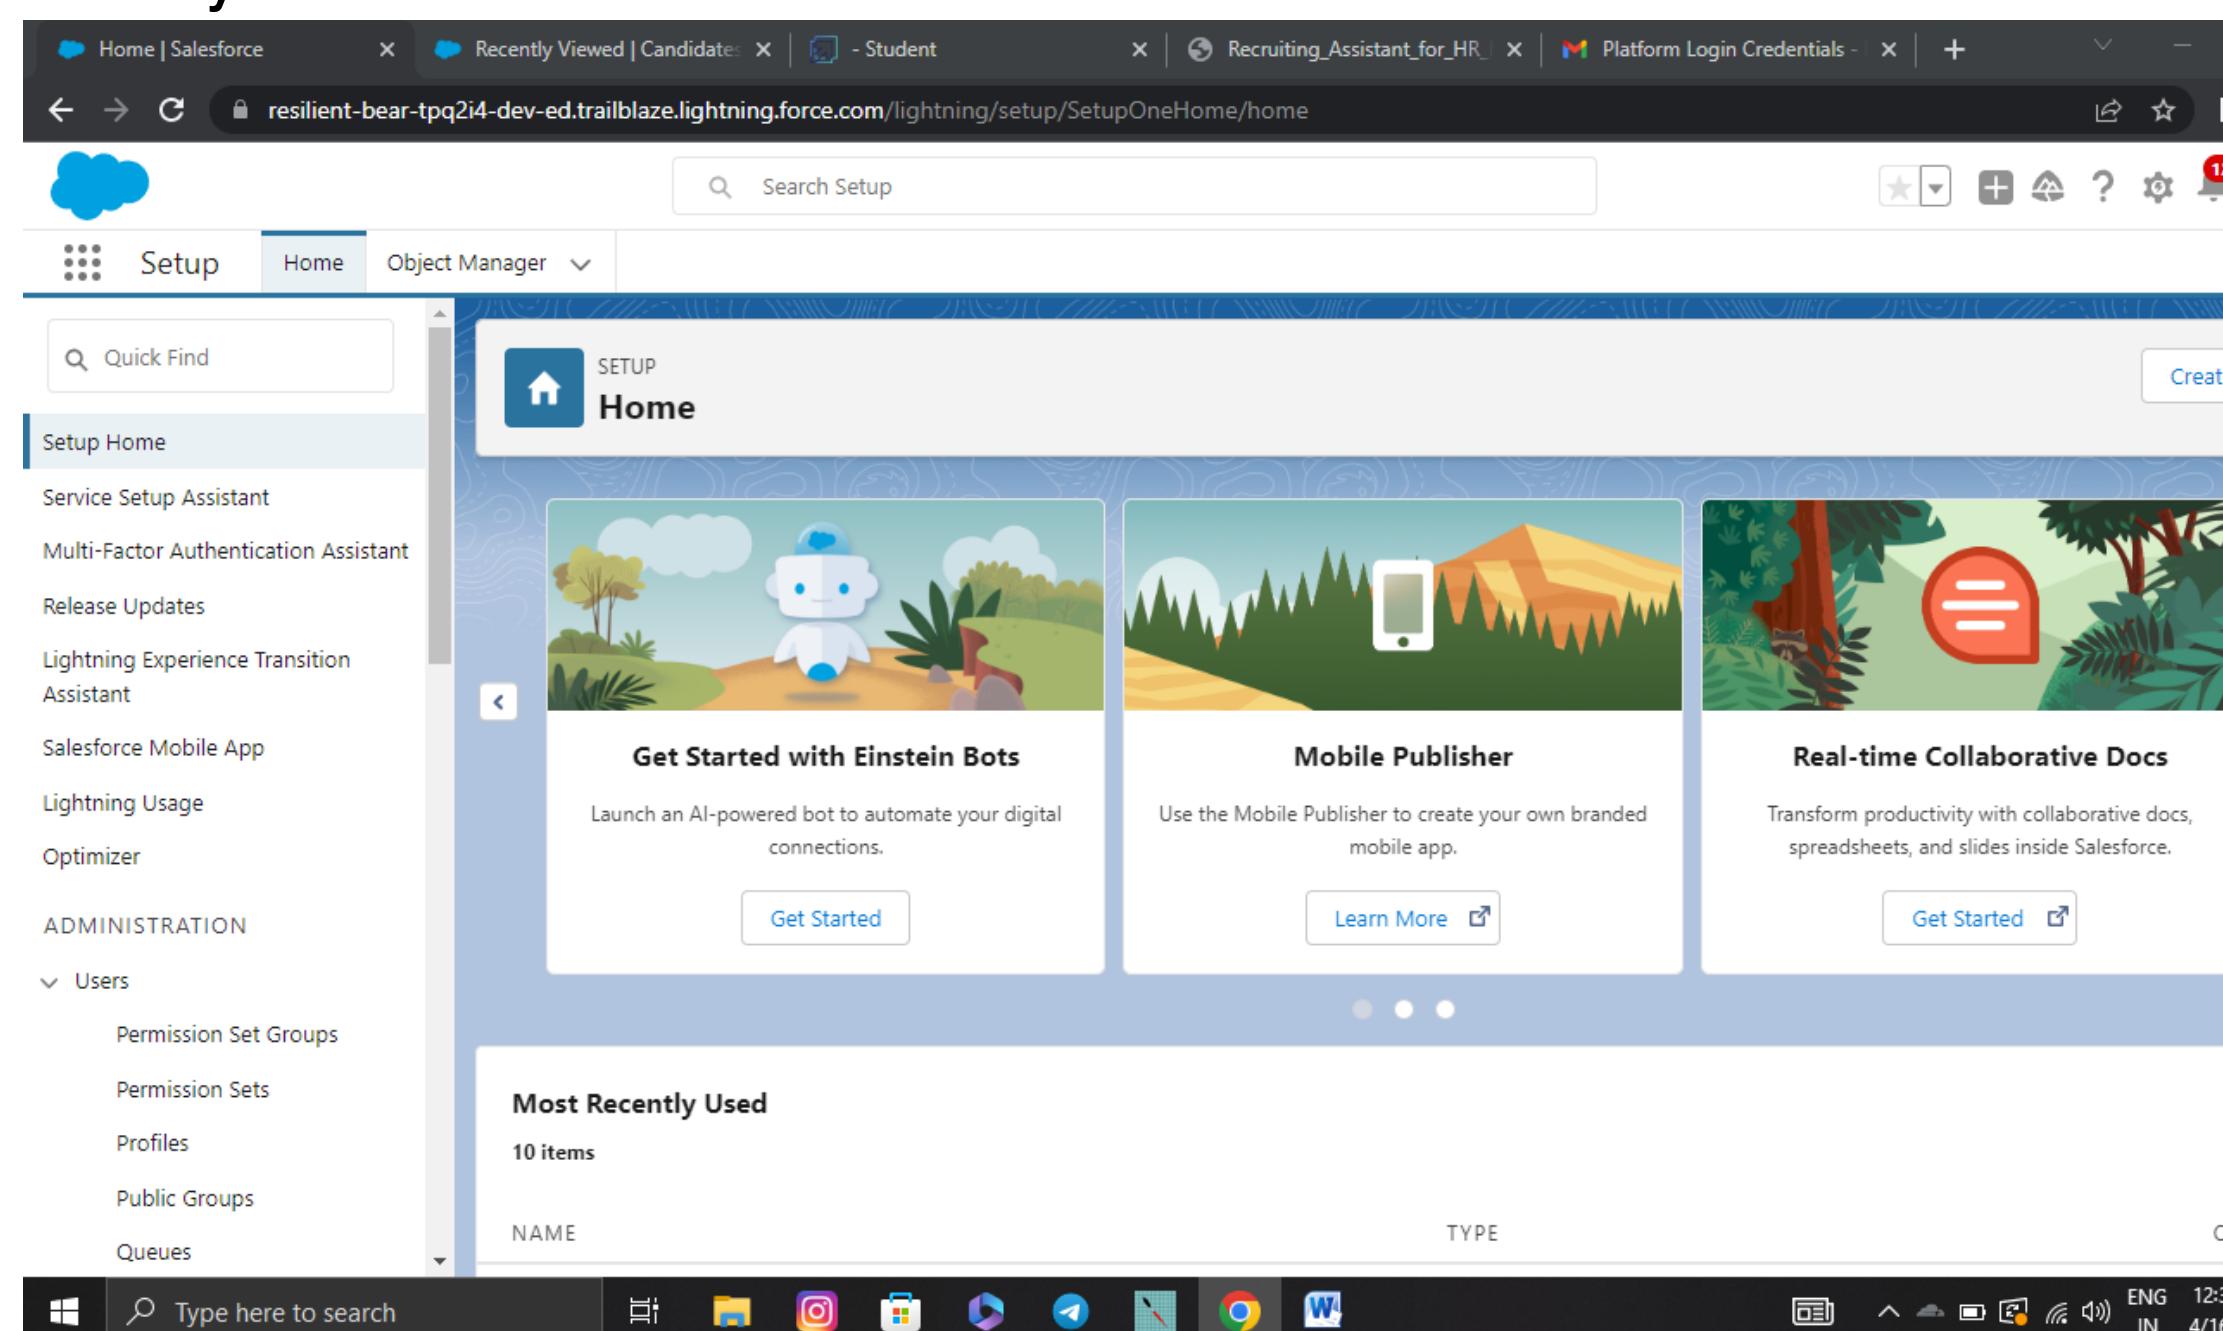

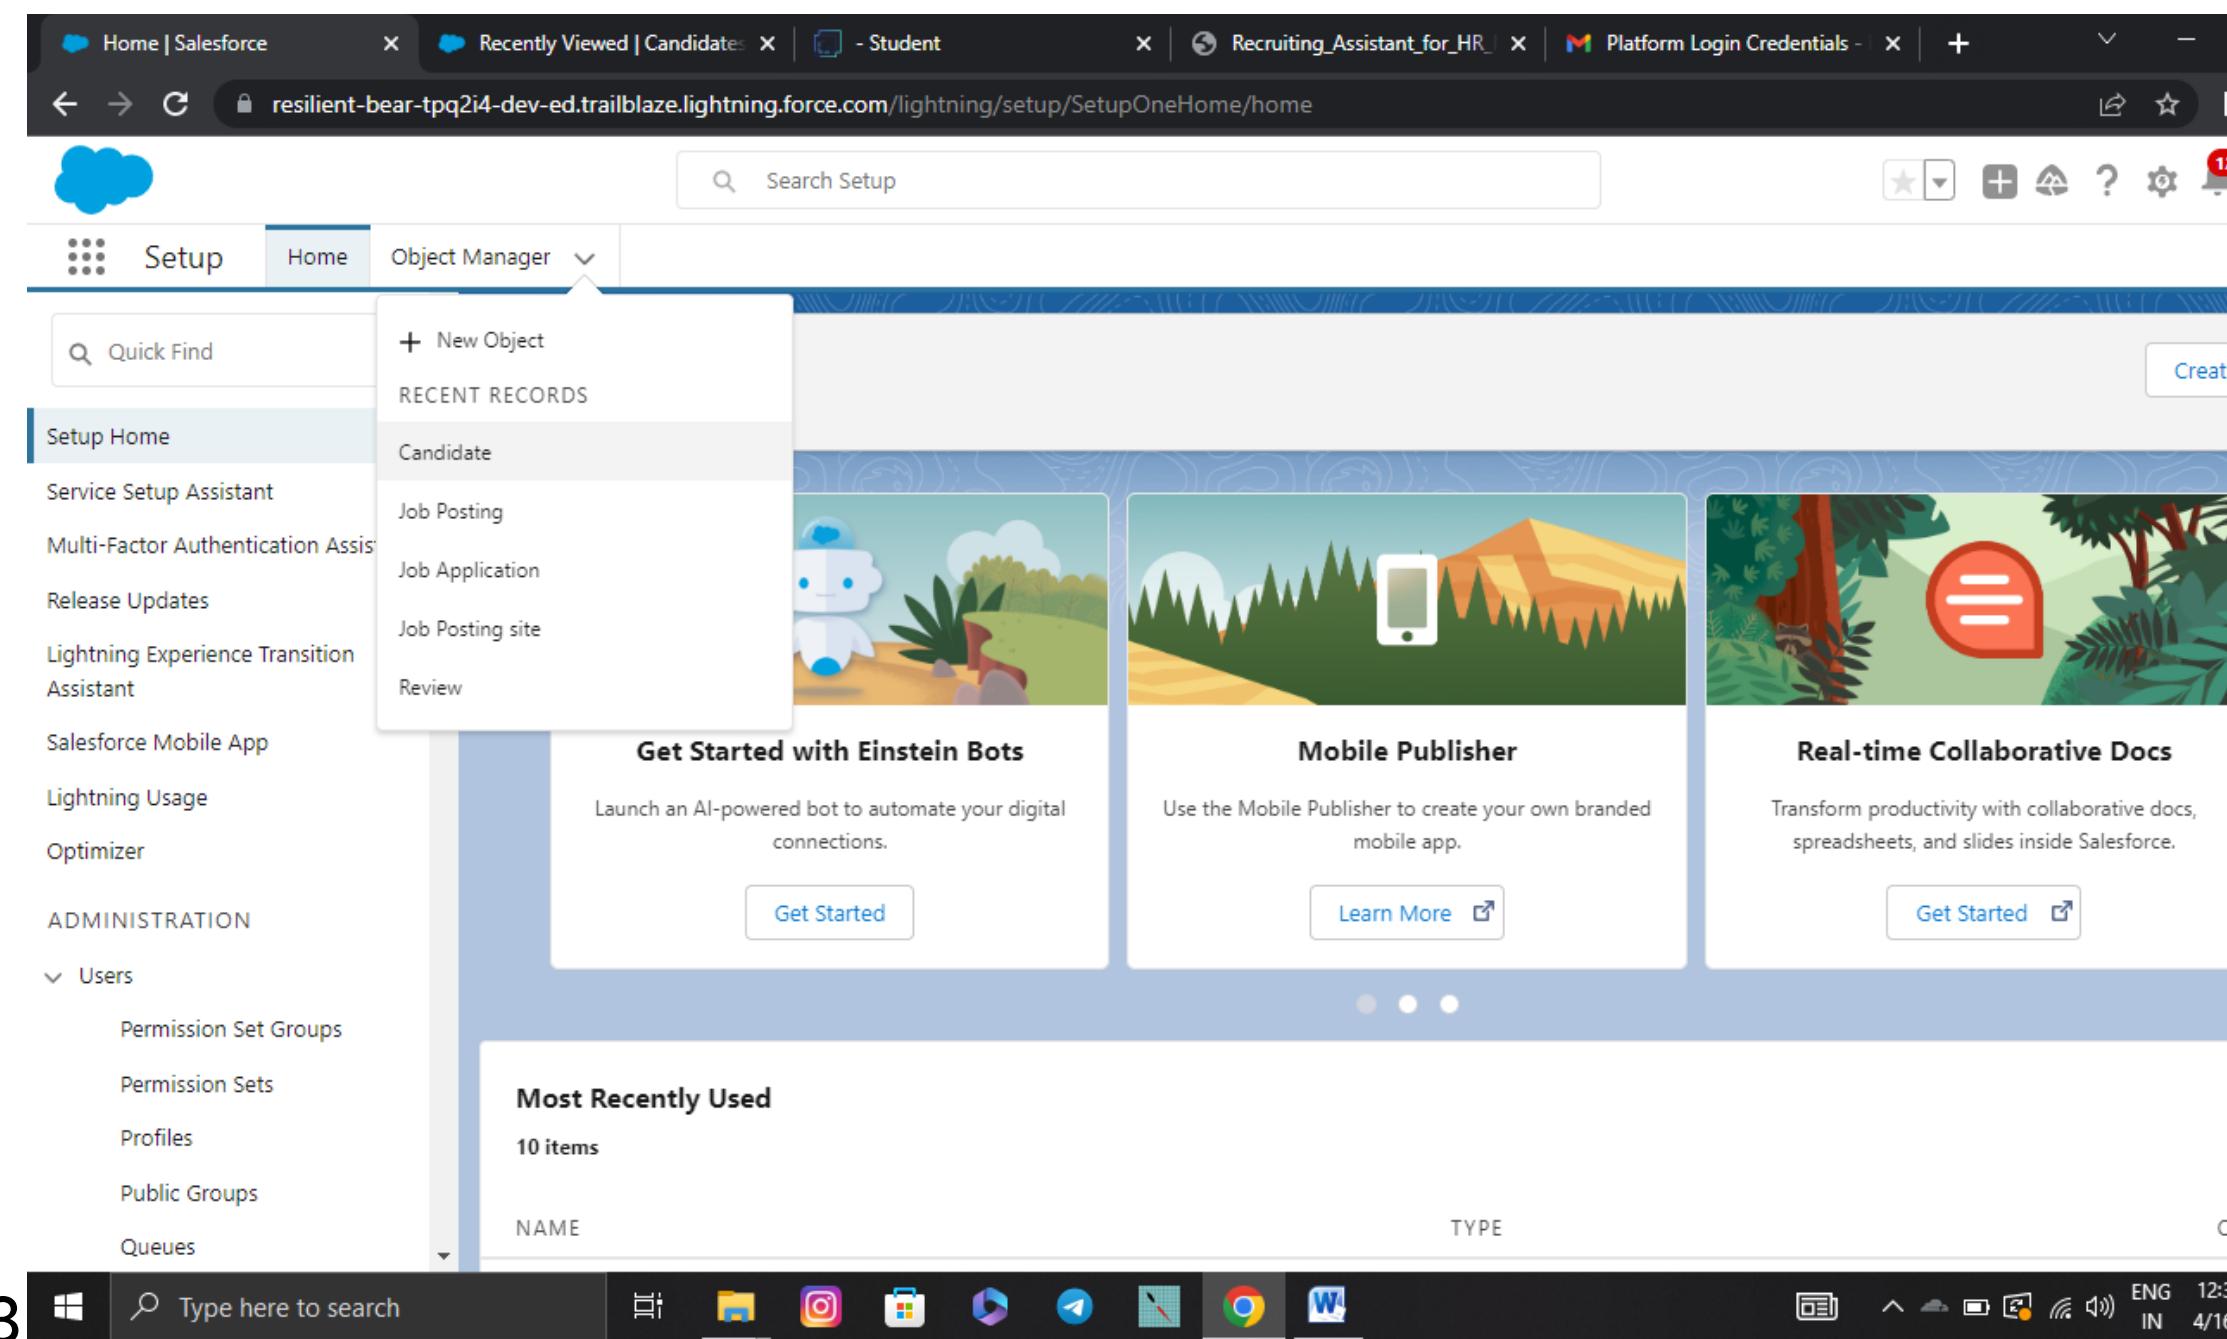

3 RESULT

3.1 Data Model:

App	Object	
Sales app	Field label	Data type
	Campaign	text
	Leads	date
Service app	Field label	Data type
	Cases	
	Accounts	

3.2 Activity & Screenshot

5 ADVANTAGES

- Less capital requirement
- More profit margin
- Credit facility
- Better customer relation
- No liability

DISADVANTAGES;

- High marketing cost
- Selling skill required
- Very high competition
- No economies of buying
- It requires proper location

6 APPLICATIONS

- Set up
- Sales
- Service
- Trailhead
- github

7 CONCLUSION

8 **Recruitment is the overall process of identifying, sourcing, screening, shortlisting, and interviewing candidates for jobs within an organization. Recruitment also is the process involved in choosing people for unpaid roles**

9 **Recruitment process is a process of identifying the jobs vacancy, analyzing the job requirements, reviewing applications, screening, shortlisting and selecting the right candidate.**
